

# AC Schnitzer ACS5 & ACS6

**AC<sup>®</sup>**  
**SCHNITZER**  
*beyond the standard.*

## AC Schnitzer ACS5: The elegant side of sporting superiority

Superiority is a characteristic of the BMW X5 even in standard form. Amongst exclusive Sports Utility Vehicles, the X5 is the best in its class for design, engineering and comfort.

The AC Schnitzer special accessory range opens up new possibilities for customizing this exclusive off-road saloon

into an individual automotive experience. The designers and engineers at AC Schnitzer have combined the unique driving dynamics and technology of motorsport with the exclusivity of superior materials, the proven functionality and unsurpassed driving comfort of the standard vehicle.

*The striking front skirt with additional air intakes at the sides doubles as front spoiler and underfloor protection. The rear skirt with integral twin silencer in Racing design, and the lowering by 15 mm, ensure a sporting yet elegant appearance.*

*The Nürburgring – known as the „Green Hell“ to motorsport enthusiasts – is also the test track for the Sports Utility Vehicle by AC Schnitzer.*

## **X5 Falcon by AC Schnitzer: Sporting dynamics with a hunting instinct**

Superlative sporting dynamics and elegance have always exerted a special fascination. Enthusiasts of the BMW marque appear particularly sensitive to this. With the X5 Falcon by AC Schnitzer, this fascination has now reached new heights. Integral wing extensions on the front and rear, and two chromed Bonnet Vents raise

overtaking prestige on the road to new levels. The AC Schnitzer front and rear skirts, and Type VII racing rims, further enhance the overall impression of superiority.

*It also works at a distance: with its striking optics and pronounced wings, the X5 Falcon by AC Schnitzer visually radiates its superior dynamics. Racing rims Type VII in 22" and the Bonnet Vents combine individual design with high quality engineering.*

## The AC Schnitzer ACS6: Ultimate Sex Appeal on four wheels.

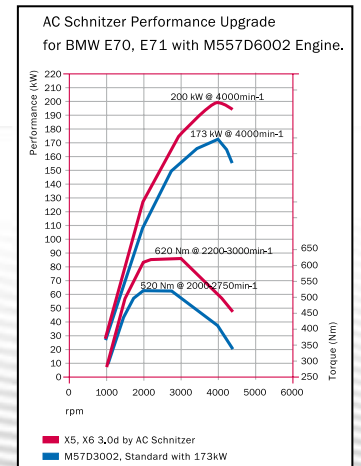

The X6 by BMW has defined a new class of vehicle: SAC – Sport Activity Coupé. Its genetic code is totally programmed for sporting dynamics and extravagance. Can you imagine a better breeding ground for the AC Schnitzer philosophy? Extracting the final reserves of driving dynamics and sporting individuality from the standard vehicle was one of the finest challenges facing the

AC Schnitzer engineers. With the aura of an exclusive brand design, here automotive individuality has entered a totally new dimension.

*The AC Schnitzer front skirt with extra air intakes replaces the standard drive-under protection, now rarely required, with an aerodynamically optimised spoiler lip.*

*The AC Schnitzer performance upgrades catapult the 3.0 litre diesel of the X5 and X6 to 272 HP and the 3.5 litre diesel to 310 HP.*

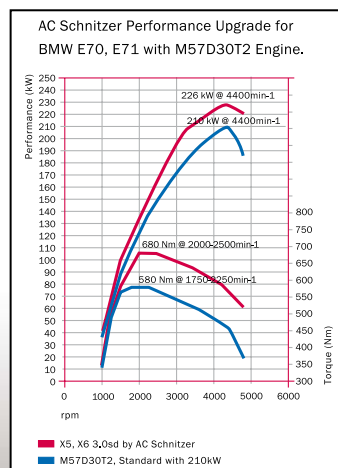

## The X6 Falcon by AC Schnitzer: Design is a reflection of top technological performance.

The exclusive aesthetics of design are always based on technology at AC Schnitzer. With many years of experience from motorsport, the special accessories range offers maximum performance for the road. As well as performance upgrades – such as for the 3.0 and 3.5 litre diesel engines – above all the AC Schnitzer spring kits take the driving dynamics to new levels. Individually develop-

ped for each vehicle type, they combine the standard driving comfort with the power reserves from motorsport. The striking aerodynamics with wider wings, and the elegant, effective rear spoiler, are visual expressions of this vehicle philosophy.

*Striking wing extensions, twin-pipe rear silencer in Racing Design, the dynamically contoured rear skirt and the two Bonnet Vents are the defining characteristics of this thoroughbred athlete.*

## AC Schnitzer Wheel Design: Designed for perfectionists.

*Type IV Racing rims in „Magic Black“ (top picture) or silver in 20“ and 22“ (centre picture).*

*Large picture: AC Schnitzer multipiece racing wheel Type VII in black with polished rim, completely silver or in BiColor (bottom pictures) for X5 and X6 in 22“.*

Although race experience and the technical intuition of the vehicle engineers were responsible for the development of the AC Schnitzer spring kits for the X5 and X6, in the choice of suitable wheels priority is given to the customer's sense of style - and he faces the problem of choice.

**The avant-garde:** as a striking re-interpretation of the five-spoke design, the AC Schnitzer Type IV racing rims have already

set new standards in all vehicle classes. The impressive rim silhouette opens up multiple styling options via the variable chrome elements in sizes 20" to 22".

**The ultimate:** with changing spread angles of the web pairs, the black paint and highly polished rim, the multipiece AC Schnitzer Type VII wheel in 20" and 22" shows its sporting credentials on the X5 and X6.

## AC Schnitzer Interior: Gladdens the heart of every motorsport fan.

Luxurious comfort and a superior feeling of space and performance make the X5 and X6 into special vehicles. The exclusive elegance of the standard models has been further refined with some motorsport-based components.

As well as a tailor-made carbon interior trim in silver, and ergonomically designed sports airbag steering wheels, numerous details ensure a true motorsport ambience. Real velours

footmats and an aluminium pedal set with foot rest provide that authentic aura in the X5 and X6 at all times.

*Customised: The AC Schnitzer carbon interior trim with Evo 3-spoke sports airbag steering wheel (large picture), centre console for the rear seat (lower picture), the aluminium cover for the BMW i-Drive system – these components cannot hide their heritage in touring car competition.*

*AC Schnitzer suspension kits: For the X5 and X6 models too, suspension components have been developed during extensive test drives in both vehicles. So driving comfort and dynamics are always perfectly balanced.*
